

Is Your Supply Chain Ready for the Electric Vehicle Revolution?

The Electric Vehicle sector is the unification of the best practices and processes of the Technology, Renewable Energy, and Automotive industries. New EV companies will be producing innovative, highly complex, digitally connected products and experiences. Are your supply chain, trading partners, and management processes ready to support this new era in the industry?

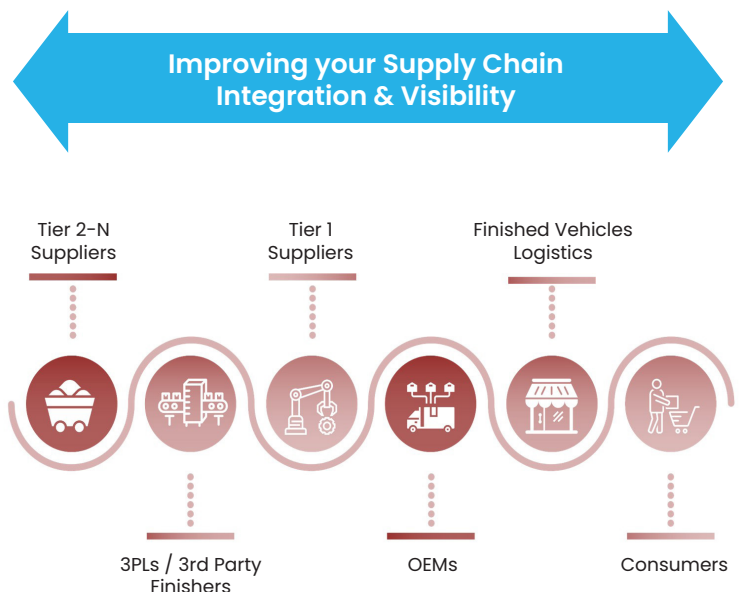

Are you part of the new EV landscape and want to align your business with industry best practices?

DiAutomotive radically improves supply chain integration, enhances digital transformation initiatives, and facilitates global industry standards such as MMOG/LE.

- Provides enhanced visibility of customer demand and JIT/delivery schedules with comprehensive reports, KPIs, and timely alerts for CSRs and Logistics teams.
- Automates ASNs and invoicing processes.
- Reduces the risk of OEM chargebacks and penalties, and improves the supplier performance.
- Ensures maximum data integrity across all functions, from Demand Management to Electronic Invoicing.
- Reduces manual and time-consuming tasks while enabling organizations to better manage exceptions and deviations.
- Enables the creation of a 100% digitally integrated supply chain.

Increase Visibility and Reduce Data Errors

The era of Electric Vehicles is here! Supply chain integration and migration to the Cloud are critical for EV OEMs and suppliers' competitiveness in the new digital markets.

- Is your company still using rigid, legacy On-Premise systems?
- Do you depend on manual processes to manage demand planning, review EDI files, or process ASNs and invoices?
- Do you lack or have limited real-time validations and notifications?
- Do you have limited visibility and integration with customers and Tier N suppliers?
- Are you facing high costs due to manual processes and OEM penalties?
- Are you looking to migrate and leverage the benefits of the Cloud?

If the answer is YES to any of these questions, we can help you!

DiAutomotive — From Visibility to Value

The Impact of Digital Process Improvements

Strategic Business Units and Processes Improved with Digitization

Supplier Process	Internal System Integration	3PL Processes	Supplier Planning	Finished Vehicle Logistics	Finance
