

AffirmedRx is shaking up the Pharmacy Benefit Management (PBM) world with a fresh, fearless approach to transparency, savings, and people-first care. Run by pharmacists and built as a Public Benefit Corporation, we're laser-focused on making healthcare work for employers and their people—not for profits.

No smoke. No mirrors. **Just results.**

Transparency that actually means something:

One Simple Fee

We've ditched the common PBM model of hidden charges and pocketed rebates. Instead, we pass every penny of savings back to our clients and stick to a single, clear administrative fee.

Crystal-Clear Data

Our clients get the full picture claims-level details and complete audit rights—to confidently control their pharmacy spending.

Compliance, Simplified

We've got your back on regulations like the Consolidated Appropriations Act (CAA), keeping your fiduciary risks low and your peace of mind high.

Good, by design.

AffirmedRx is a Public Benefit Corporation, meaning **we're built to do good—by design.**

Our independence keeps us free from conflicting interests, so every decision we make supports what matters most: **better outcomes and true transparency for you and your members.**

Shared vision, big results:

At AffirmedRx, we simplify the complexities of filling prescriptions so patients can **confidently access the best care to get and stay healthy.**

Care that goes **beyond the counter**

Patient Care Advocates (PCAs)

Our PCAs don't wait for **problems**, they solve them before they happen. Prior authorizations? Lower-cost options? Done.

Tech That Makes Life Easier

Our app helps members manage prescriptions, **find savings**, and **switch pharmacies with a tap**.

Results That Matter

Better adherence, fewer headaches, and **real health outcomes**. Happy members, happy employers.

Savings that deliver

PMPM Guarantee Standard

One number you can count on, tailored to your plan maximizing savings. We lock in your annual PBM drug spend at a maximum all-in PMPM in Year 1 and **own the risk dollar for dollar should we miss it**.

Smart Formulary Management

We're all about balancing efficacy and affordability. Think **significant savings** without cutting corners on care.

Why AffirmedRx?

We're not here to play the same old PBM game.

AffirmedRx isn't just another PBM—we're the "First, Best, Only" PBM designed by employers, for employers. Our bold, transparent, and people-driven approach ensures a partnership that changes the game. As a Public Benefit Corporation, we prioritize people over profits and avoid conflicts of interest, such as owning pharmacies or pushing high-margin drugs. Let's work together to set a new standard in pharmacy benefits.
